

Sector Group Status and Next Steps

April 24, 2007

Status:

- Began process with 207 policy options
- Sector groups consolidated these down to 90 options.

Consolidation Summary:

Sector	Original	Consolidated
Agriculture/Forestry	46	18
Cross-Cutting	14	9
Energy Supply	46	27 (in 8 categories)
RCI	85	23
Transportation/Land Use	16	13
Total	207	90

Next Steps:

- Based on the findings of other studies, staff will gather information for each policy option on:
 - Emissions reduction potential
 - Cost
- Sector groups will review and refine these estimates and help complete worksheets for each option.
- Sector groups will then use this information to characterize each option as low, medium, or high emissions reduction potential – AND – low, medium, or high cost.
- Sector groups will use a combination of emissions reduction potential, cost, and other worksheet information (e.g. political feasibility, timeline to completion, other impacts, etc.) to sort options into A, B, C, and D bins for BRAC report.
